POWER BY NATURE

Residential

Commercial

Industrial

Clean, Eternal and Smart Energy

Vision

To offer a simple, universally acceptable, easily maintainable system of green energy to humanity at large.

Mission

To generate renewable energy every year by creating more number of solar peers and developing most respected and trusted brand in the market.

Values

- ① EXCELLENCE IN QUALITY
- ② CUSTOMER COMMITMENT
- ③ INTEGRITY
- ④ PERSONAL ACCOUNTABILITY

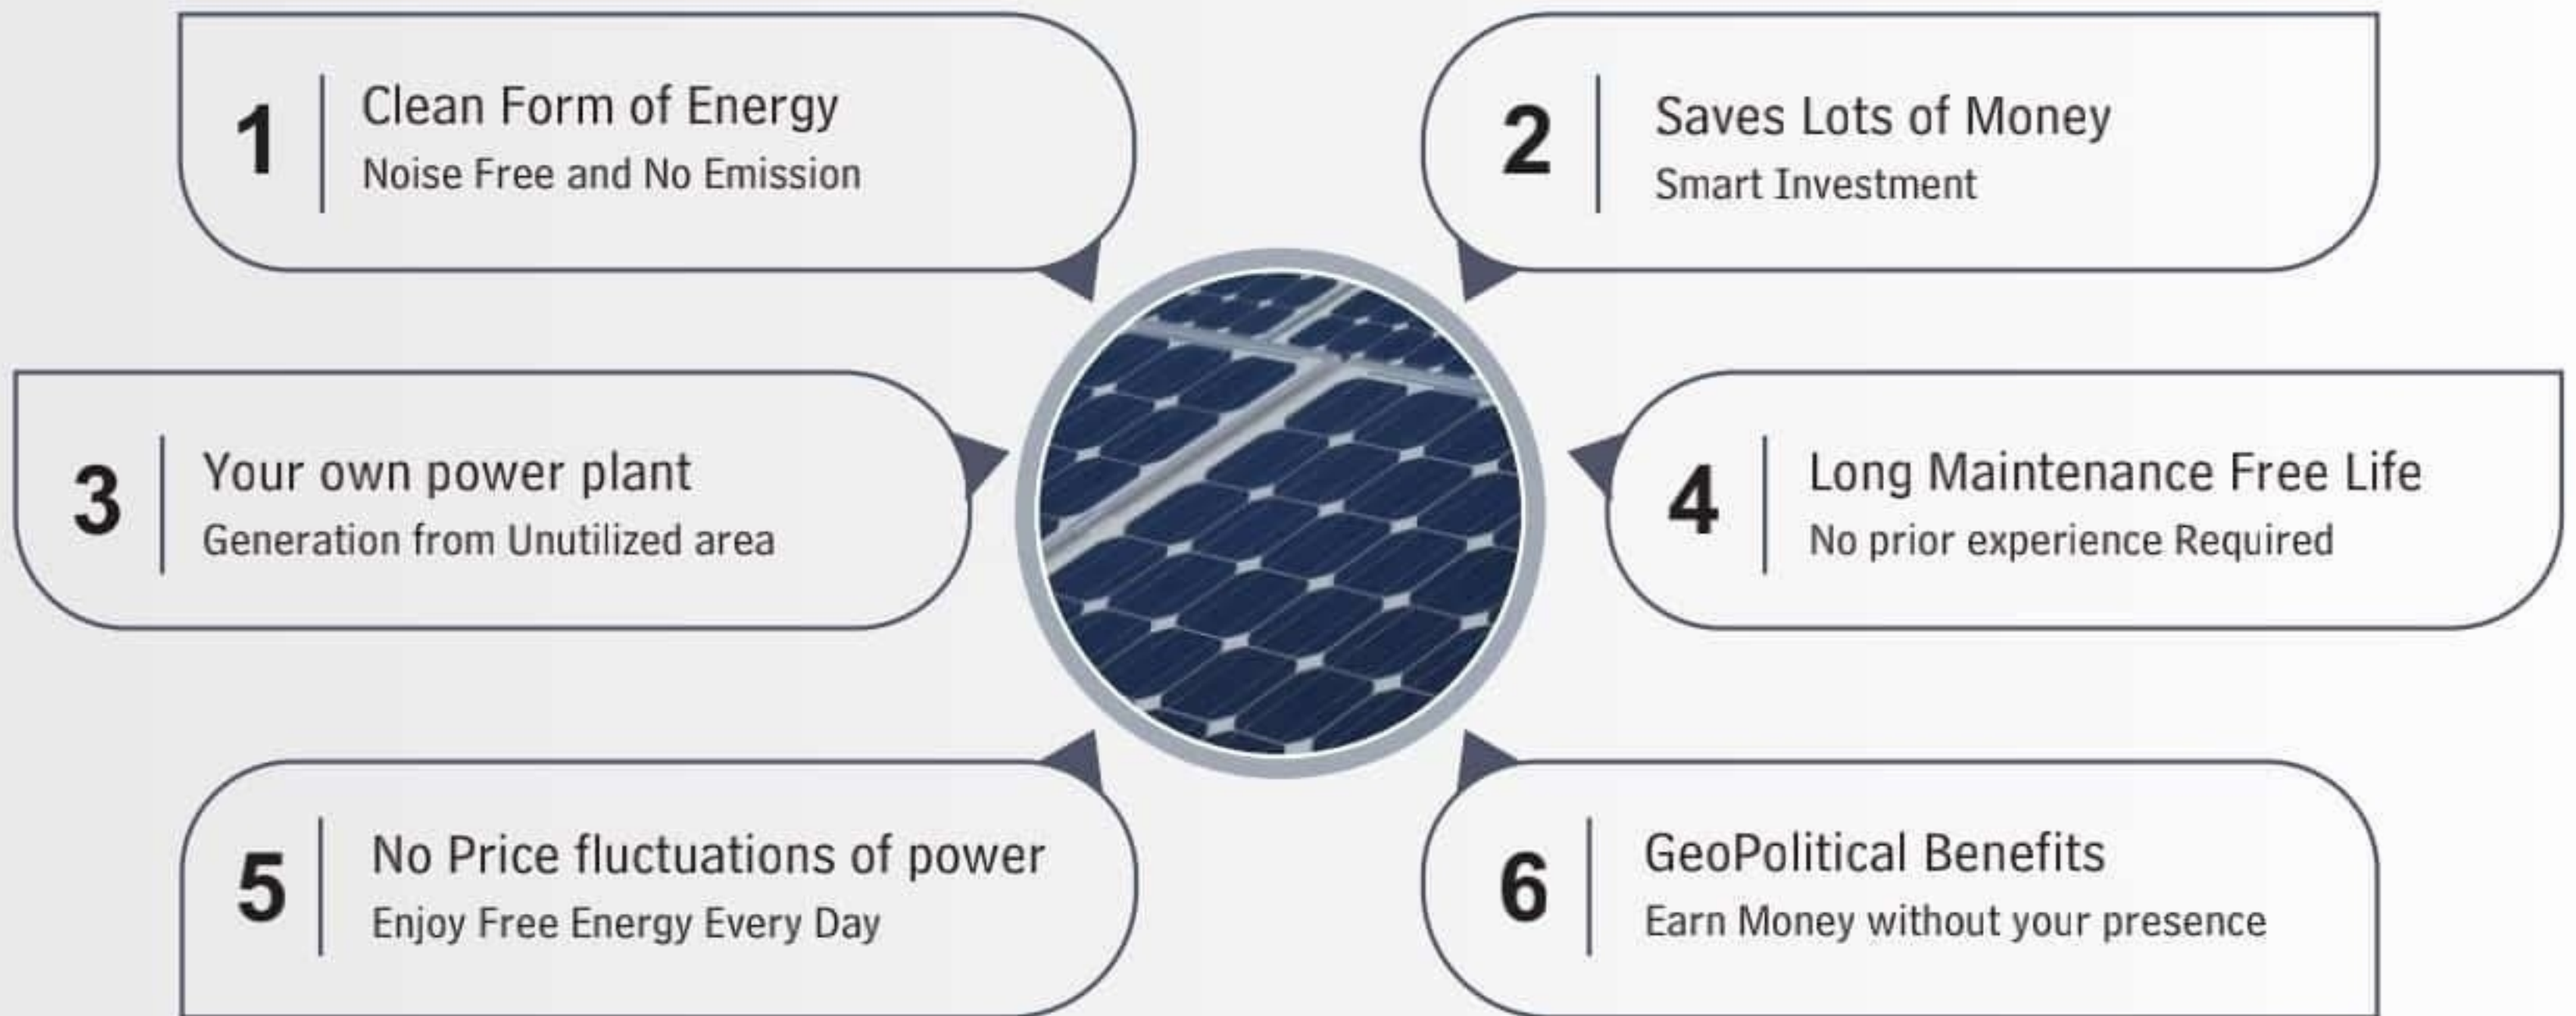

About Suncell

We would like to introduce our company Suncell Solar LLP, a wholehearted solar company based in Bhavnagar, India with our operations spread across the Nation. We offer innovative solutions to industry for renewable energy and the most important in order to reduce carbon foot print of individuals. Suncell has presence in solar energy market with high efficient solar power plants. The key is to provide a beautiful, efficient, affordable and a seamlessly integrated environmental friendly Solar Photovoltaic system to our customers. We carry the entire project in such a way that, our customers feel contented & elated at the end of it.

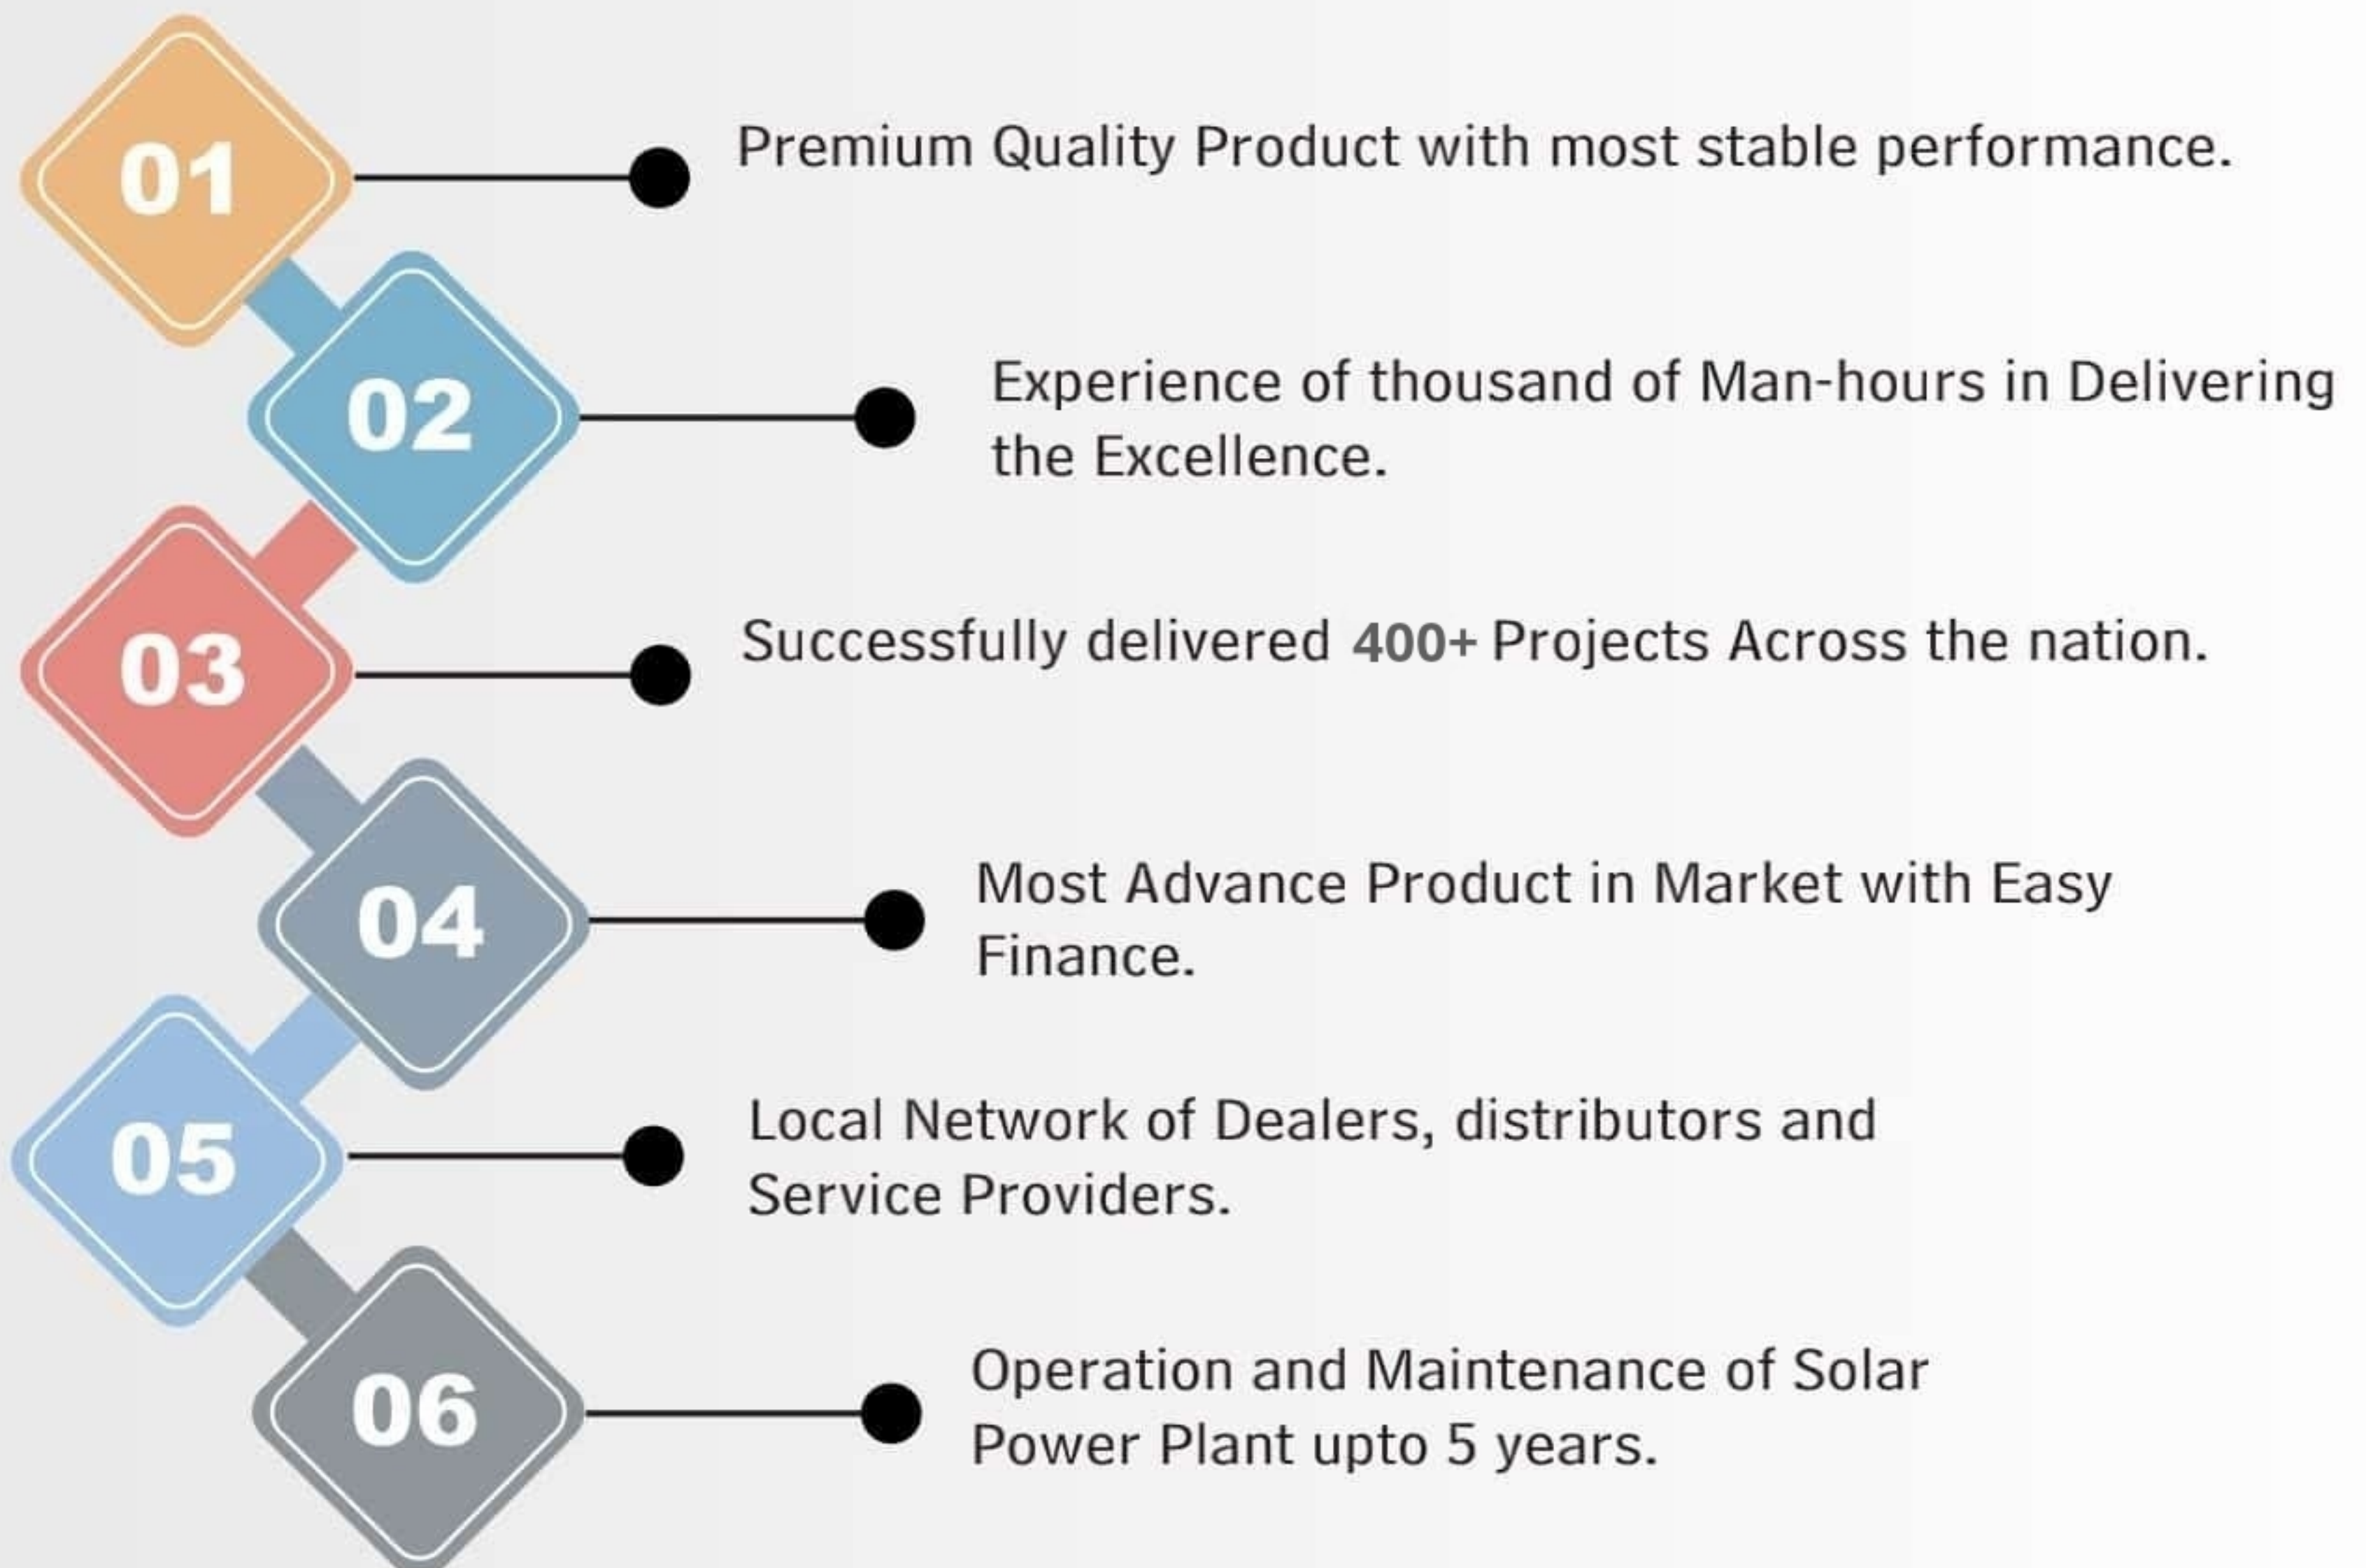

OUR SERVICES :

- * Turn-Key EPC Projects
- * Techno-commercial feasibility analyses with Detailed Project Report
- * Project Designing and Engineering
- * Statutory Approvals for site and project
- * Project Planning & Execution, Installation and Commissioning
- * Operation & Maintenance
- * Plant Performance monitoring for peak output
- * World Class Solar Equipment

Six Convincing Reasons to Go for Solar

Six Convincing Reasons to Go with Suncell

Solar roofs

"Want to cut off your electricity bills by generating your electricity and selling it to the power grid?"

Solar Power Plant for your Premises is great idea, where your all electricity needs will be satisfied by Solar Energy and you can earn extra income from generated additional units.

Solar panel converts solar radiation in to DC electric power

Smart Inverter converts DC into Ac Power

Protection Box Protects Power plant from Hazards

Online Monitoring system keeps you always updated

Net meter Measures excess Energy fed into Grid

Key features

Generates 4 to 5 Units Per KW

Long Life of 25 Years

Maintenance Free Life

Safe and Noise Free Operation

99.95% Uptime

Easy Finance Option

Solar Industrial & Utility Plants

"Is ever increasing cost of electricity burning all profit? There comes solar to rescue!"

Solar power plant for industrial users provides perfect combination of distributed generation benefit. Industrial need of electricity is different than homes and who, better than us, can understand that. Suncell Solar have dedicated design and EPC team to cater industrial solar needs. Suncell Solar provides power plant compliant to all IEC and IS grades, considering safety and regulatory standards.

Suncell Solar Provides dedicated services support to industrial consumers. Our installation process goes through 7 stages.

Design

Authorizations

Material Supply

Mounting of Structures

Mounting & Wiring of PV Panels

Mounting & Wiring of Inverters

Testing Plant & Connection to the Grid

Key Benefits

- 1** Lower cost of electricity, means lower cost of production and higher profits
- 2** 40% (+20%*) Depreciation in first year & from next year and onwards 40% means huge tax saving
- 3** No fear of electricity rate escalations get free electricity after payback period
- 4** Short payback period of 3 to 4 years which matches industrial standards
- 5** Use green energy and convert your factory into green product manufacturing unit

*20% Additional Depreciation for manufacturing Industries
